R Markdown Presentation & Plotly

Mpho Godfrey Nkadimeng

17/10/2019

Create a web page presentation using R Markdown that features a plot created with Plotly. Host your webpage on either GitHub Pages, RPubs, or NeoCities. Your webpage must contain the date that you created the document, and it must contain a plot created with Plotly. We would love to see you show off your creativity!

```
data("presidents")
library(plotly)
```

```
## Loading required package: ggplot2
```

```
##
## Attaching package: 'plotly'
```

```
## The following object is masked from 'package:ggplot2':
##
##     last_plot
```

```
## The following object is masked from 'package:stats':
##
##     filter
```

```
## The following object is masked from 'package:graphics':
##
##     layout
```

```
#The presidents dataset is the (approximately) quarterly approval rating for the
President of the United States from the first quarter of 1945 to the last quarter
of 1974.
plot_ly(x=time(presidents), y=presidents, type="bar")
```

```
## Warning: Ignoring 6 observations
```
